February, 2014

### Stay Connected - READ

Help your child understand the value of reading and how it is connected to so many of our daily activities such as:

- **Communication.** Life without mail, email and notes would be difficult-and not as interesting. Encourage your child to exchange emails or letter with friends or relatives.
- **Instructions.** Have your child read recipes as you cook. Read a manual with your child that explains how to use a gadget.
- **Fun.** Your child can choose almost anything to learn about-and do it by reading! Help him find books that answer his questions.

### Tips for Student Success

- + Ask your child about his or her day. Go over school work together.
- + Help build self-esteem by praising your child's efforts. Let her know you're proud of her.
- + Support your child by letting him know it's OK to make mistakes. Remind him that it's the effort that is most important.
- + Encourage questions. Children like to learn how things work and why things happen. Find the answers together.
- + Attend parent-teacher conferences. Write down questions you'd like to discuss.

### Science Corner

#### Fun Science Activities to do at home

- ✓ Take walks together. Talk about trees, flowers or animals you may see.
- ✓ Observe a full moon together.
- ✓ Let your child take care of a plant.
- ✓ Talk with your child about recycling. Have her sort objects for recycling containers.
- ✓ Have family discussions about news stories that are science based, like space shuttle missions, or severe weather conditions.

For your child to participate in the spring screening for the 4K program, please register as soon as possible.

Do a crossword puzzle with your child. It is a great way to learn new words.
